

Over the last few years, neue Holzbau AG has developed from a regional wood processor into an innovative and dynamic enterprise. Working exclusively with WOOD - the only renewable raw material - we calculate, plan and produce high-quality timber structures.

For our n'H-Team in Lyss, we are currently looking for a proactive and self-reliant

## Wood Construction Engineer, University of Applied Sciences, International (m/f)

### Key responsibilities:

- Design and conception of timber structures
- Structural calculations/dimensioning of timber structures
- Independent management and supervision of properties in Switzerland and abroad
- Further development of n'H products
- Implementation/support of international projects, from offer to invoice
- Travel required

### Suitable candidates:

- Independent worker with initiative, fast learner, team player
- Entrepreneurial approach
- IT experience (Cadwork, MS-Office, R-Stab)
- Fluent spoken and written German and English

### We offer:

- Permanent position with up-to-date remuneration
- Independent, interesting and responsible work
- Career opportunities
- Young, forward-looking TEAM
- Place of employment: Lyss BE
